Attn: Daron Haddock

Permit Supervisor

West Ridge Mine C/007/041 Re:

Permit Change to Include Storage Shed

Clean Copies, Task 3540

Dear Mr. Haddock:

Enclosed are six (6 ea.) clean copies of an amendment to the West Ridge MRP to include a storage shed. This submittal is a response to Cessation Order 10051.. Also included is a set of revised pages from the bonding calculations spreadsheet.

If you have questions or comments please contact me at (435) 888-4017.

APPLICATION FOR PERMIT PROCESSING

Permit Change □	New Permit □	Renewal	Transfer	Exploration	Bond Release □	Permit Number:	C/007/041

Title of Proposal: Clean copy, Change to include storage shed, Cessation

Mine: WEST RIDGE MINE

Order 10051 Task 3540

Permittee: WEST RIDGE Resources,

Inc.

Description, include reason for application and timing required to implement:.

Instructions: If you answer yes to any of the first 8 questions (gray), submit the application to the Salt Lake Office. Otherwise, you may submit it to your reclamation specialist.

□ Yes	₩No	1. Change in the size of the Permit Area? acres Disturbed Area? acres □ increase □ decrease.
□ Yes	Mo	2. Is the application submitted as a result of a Division Order?
□ Yes	₽Ńo	3. Does application include operations outside a previously identified Cumulative Hydrologic Impact Area?
□ Yes	₽Ńo	4. Does application include operations in hydrologic basins other than as currently approved?
Yes	№No	5. Does application result from cancellation, reduction or increase of insurance or reclamation bond?
□ Yes	No	6. Does the application require or include public notice/publication?
Yes	No	7. Does the application require or include ownership, control, right-of-entry, or compliance information?
□ Yes	⊯ No	8. Is proposed activity within 100 feet of a public road or cemetery or 300 feet of an occupied dwelling?
Yes	□ No	9. Is the application submitted as a result of a Violation?
□ Yes	₩o	10. Is the application submitted as a result of other laws or regulations or policies? Explain:
□ Yes	₩No	11. Does the application affect the surface landowner or change the post mining land use?
□ Yes	₩ No	12. Does the application require or include underground design or mine sequence and timing?
□ Yes	No	13. Does the application require or include collection and reporting of any baseline information?
□ Yes	₫ No	14. Could the application have any effect on wildlife or vegetation outside the current disturbed area?
□ Yes	No	15. Does application require or include soil removal, storage or placement?
□ Yes	No	16. Does the application require or include vegetation monitoring, removal or revegetation activities?
Yes	□ No	17. Does the application require or include construction, modification, or removal of surface facilities?
□ Yes	₩ No	18. Does the application require or include water monitoring, sediment or drainage control measures?
Yes	□ No	19. Does the application require or include certified designs, maps, or calculations?
□ Yes	₽∕No	20. Does the application require or include subsidence control or monitoring?
Yes	□ No	21. Have reclamation costs for bonding been provided for?
□ Yes	€ No	22. Does application involve a perennial stream, a stream buffer zone or discharges to a stream?
□ Yes	No	23. Does the application affect permits issued by other agencies or permits issued to other entities?

□ Attach _3_ complete copies of the application.

I hereby certify that I am a responsible official of the applicant and that the information contained in this application is true and correct to the best of my information and belief in all respects with the laws of Utah in reference to commitments, undertakings, and obligations herein. Provide a detailed listing of all changes to the mining and reclamation plan which will be required as a result of this proposed permit application. Individually list all maps and drawings which are to be added, replaced, or removed from the plan. Include changes of the table of contents, section of the plan, pages, or other information as needed to specifically locate, identify and revise the existing mining and reclamation plan. Include page, section and drawing numbers as part of the description.

DIV. OF OIL, GAS & MINING

d) Mine Portals

Mine portals will be located in the right fork on the southeast side of the canyon where the coal seam outcrops. Four portal openings will be constructed to provide surface access to the underground mine workings. Two portals will provide intake ventilation to the mine, one of which will serve as the primary accessway for employees and materials in and out of the mine. One portal will contain the main conveyor belt used to bring coal out of the mine. The fourth portal will accommodate the main mine fan. These portals will be spaced as close together as possible to minimize the length of highwall required for access to the underground workings.

e) Mine Fan

The mine fan will be located at the return air portal. It will be a 12' diameter, direct drive, 1,000 hp, axial vane exhausting type fan. The fan housing will include airlock travel doors for machinery and personnel. The exhaust ductwork will be quipped with acoustical sound-proofing material to keep noise levels at a minimum. An auxiliary blowing fan will be installed in the #3 intake portal.

f) Bathhouse/Lamphouse

The bathhouse building will be a pre-fabricated metal structure measuring approximately 40 feet wide by 120 feet long. It will be located in the central part of the mineyard in convenient proximity to the mine portals. An employee parking lot will be located nearby. The bathhouse will be sized to accommodate the anticipated workforce of about 130 employees. Located at one end of the bathhouse building will be the lamp house and the offices for the mine supervisory personnel. Four temporary locker units will also be installed, as well as several temporary laundry storage units, and an office trailer.

g) Shop/Warehouse

The shop/warehouse building will be a pre-fabricated metal structure measuring approximately 60 feet wide by 160 feet long. It will be located in the northern part of the mineyard conveniently adjacent to the mine portals. A storage area for materials and supplies will be located nearby, as will be the fuel storage, rock dust storage and garbage repository (dumpster) facilities. A 40' x 60' enclosed storage shed will be constructed adjacent to the shop on the south end.

h) Coal Stockpiling Facilities

Coal will be brought out of the mine and delivered to the surface via a 2,000 ton per hour, 60" wide mine conveyor belt. The mine conveyor will exit out of a portal located about 40' high on the east side of the right fork of C Canyon. Even though the mine portals are located in the right fork, the run of mine coal will be
